

ADARSH KRISHNA SM

Mobile No: 7356322716

Email id: adarshkrishna.me@gmail.com

CAREER OBJECTIVE

Computer Science graduate (Diploma + BTech) with internship experience in Python, IoT, and AI. Passionate about cloud computing and data analysis, eager to contribute to cloud-enabled, data-driven solutions. Seeking entry-level opportunities in Data Analytics, or Python Development.

EDUCATION

- **Bachelor of Technology in Computer Science Engineering** from College of engineering Adoor in 2026
- **Diploma in Computer Hardware Engineering** from JDT Islam Polytechnic College, Kozhikode with 7 CGPA in 2023

CERTIFICATIONS & WORKSHOPS

- **Python Programming in Artificial intelligence and Machine learning**— June 2025 /Akira Software solutions / Onsite
- **Generative AI Workshop** — NxtWave — Dec 2024 “Build Your Own Generative AI Model” | Online
- **IoT Application Development Internship** — ICT Academy of Kerala — June 2021

ACADEMIC PROJECTS

- **Electra Wheels:** Developed a multi-role smart mobility platform using Python, Django, and Android. Architected a centralized web management dashboard and a MySQL database to handle real-time system administration, automated booking flows, and data synchronization between users and stations.
- **Air Quality Index Predictor:** Developed an interactive multi-page Streamlit web app utilizing a Scikit-Learn regression model for low-latency AQI forecasts based on 7 critical pollutant vectors, styled with custom responsive CSS.
- **Water ATM System :** Built an automated water dispensing system using sensors - Learned microcontroller basics and real-world system design - Applied IoT and embedded knowledge
- **Hostel Management Website :** Web app for room allocation, user login, and data storage - Tools: HTML/CSS, PHP, MySQL - Strengthened frontend backend connectivity

TECHNICAL SKILLS

- **Languages:** Python, PHP, HTML5, CSS3
- **Frameworks & Tools:** Django, Streamlit, Scikit-Learn, Android SDK, Pickle
- **Databases:** MySQL
- **Hardware/IoT:** Microcontrollers, Sensor Integration, Embedded Systems
- **Core Competencies:** Full-Stack Development, Machine Learning Inference, Multi-role System Architecture
